

Priory of Brittany: Inauguration of the new building of the CMPP of Brest

On December 21st we have inaugurated the new building of our medical-psycho-pedagogical center (CMPP) for childcare from birth to 20 years. This center provides more than 11,000 sessions per year to 700 children. It is a center of consultations that establishes diagnostics and gives care to children and adolescents with psychological, emotional difficulties:

in particular, behavioral disorders,

malaise, situations of failure, functional disorders and language disorders ...

This center was created by our association in 1971. Today it was necessary to modernize and enlarge the building. Funding for 750 000\$ was provided by donations, loan and funds from the Association for Humanitarian actions undertaken by the Priory of Brittany in France.

CMPP Manager and Chevalier Philippe Vincent

It was our President, Chevalier Philippe Vincent, who made the inauguration in the presence of the Brest town hall representatives, the staff and the Director of the Center and many knights.
