

2023 MAJOR PROJECTS

DEVELOPING A RAISON D'ETRE. We continue to support our capital project, to build a centre of Excellence in Pediatric Palliative care. It will be the first of its kind in Denmark, in fact in all of Scandinavia. Every one of our members is totally committed to achieving our mission, knowing that it may take five to six years to see its doors open. Completing our Certification requirements of having 1 million DKK in our OPEX account has proven to be a challenge and as a result we were unable to launch our fundraising campaign this year. We have raised almost 500,000 DKK and hope to raise the balance in 2024-25 so that we will receive tax exemption status for our Foundation and be able to issue tax receipts.

It should be noted that we have over 300 non-member donors on our database and hope to increase this in 2024.
